

Introducing the Kromski Sonata

www.fiber2yarn.com

The Sonata, from the Kromskis of Poland, is a marriage between the classic architecture and design concepts shared with all other Kromski wheels and the functional needs of a wheel that folds. You get both.

It is a full-size spinning wheel that folds and packs away as a small package, making it perfect for traveling, guild and festival gatherings or simply storage when not in use.

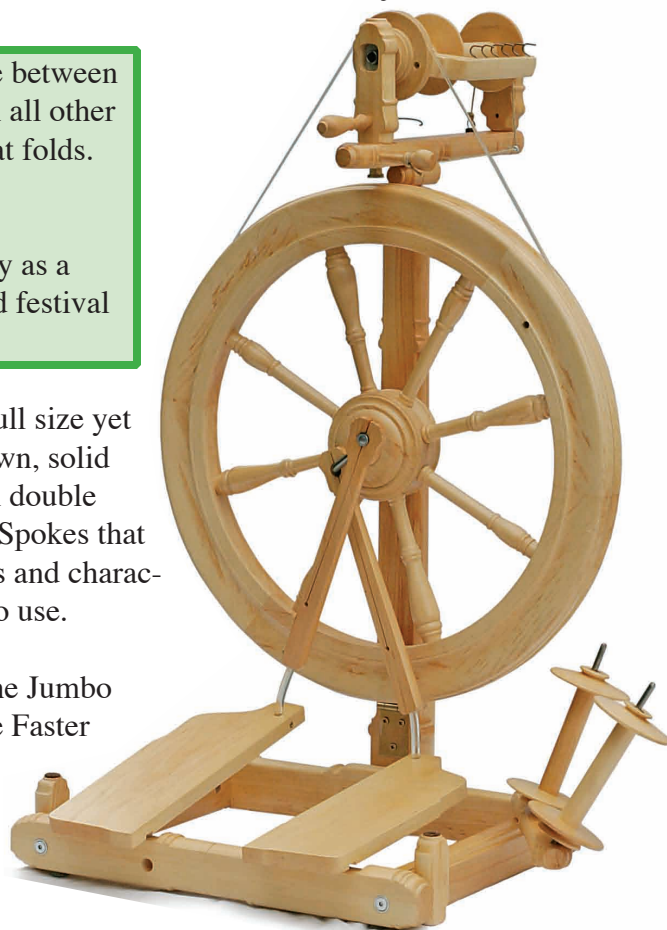

The Kromskis have put a lot of thought into the Sonata. Full size yet small dimensions when folded, easy to set-up and take down, solid feel, solid footprint, plenty of foot room, easy treading on double treadles, orifice at a comfortable height and classic looks. Spokes that draw your attention, every piece of wood with cuts, curves and character; this is an appealing spinning wheel that is a pleasure to use.

Optional flyers can add to the total range of the Sonata. The Jumbo flyer offers lower ratios and a larger orifice - .70" - and the Faster flyer increases the ratio range up to 18:1. (final ratios for these flyers to be announced soon.) A custom-made, heavily padded bag offers you a convenient way to pack-up your Sonata for travel or storage. Available in the US and Canada late October.

Details

- wheel diameter - 19"
- folded dimensions: 22" by 19"
- orifice height - 30", but can be raised as much as 2" size - 3/8"
